Komponen Yang Dinilai	Nilai Maksimal Jurnal Ilmiah			Nilai Akhir Yang Diperoleh
	Internasional	Nasional Terakreditasi	Nasional Tidak Terakreditasi	
	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
a. Kelengkapan unsur isi jurnal (10%)	4,00			4
b. Ruang lingkup dan kedalaman pembahasan (30%)	12,00			10
c. Kecukupan dan kemutakhiran data/informasi dan metodologi (30%)	12,00			11
d. Kelengkapan unsur dan kualitas terbitan/jurnal (30%)	12,00			10
Total = (100%)	40,00			35
Nilai Pengusul = (60% x 35) = 21				

Catatan Penilaian artikel oleh Reviewer :

1. Kesesuaian dan kelengkapan unsur isi jurnal:

Artikel memiliki konten yang sudah sesuai dengan template yang disyaratkan oleh jurnal yang dituju. Dan memenuhi kaidah-kaidah publikasi ilmiah yang berkualitas

2. Ruang lingkup dan kedalaman pembahasan:

Tata tulis memiliki kualitas biasa/normal, pembahasan jelas, tulisan berupa komparasi performa hullform untuk digunakan sebagai livestock carrier memberikan bahasan yang cukup komprehensif

3. Kecukupan dan kemutakhiran data/informasi dan metodologi:

Kemutakhiran kajian yang diangkat dan disajikan cukup baik, paparan mengenai performa tiap-tiap hullform yang dibanding telah dijelaskan dengan sangat baik

4. Kelengkapan unsur dan kualitas terbitan:

Jurnal terindeks scopus dengan nilai SJR 0.23, Q2, masuk dalam kategori yang baik dan dapat digunakan sebagai prasyarat untuk ke jabatan Lektor Kepala

Total = (100%)	40,00			32
Nilai Pengusul = (60% x 32) = 19,2				

Catatan Penilaian artikel oleh Reviewer :

- Kesesuaian dan kelengkapan unsur isi jurnal:**
Kesesuaian dan kelengkapan telah memenuhi unsur-unsur yang disyaratkan oleh jurnal yang dituju. jurnal mempunyai prosedur review yang baik.
- Ruang lingkup dan kedalaman pembahasan:**
Ruang lingkup jelas dan pembahasan memiliki kontribusi yang baik bagi pemilihan hullform untuk livestock carrier. Pembahasan performa hullform dibahas dengan komprehensif
- Kecukupan dan kemutakhiran data/informasi dan metodologi:**
Informasi dan metodologi yang diangkat merupakan modifikasi dari desain yang sudah ada, meskipun tidak 100% baru tapi desain cukup mutakhir dan memiliki kontribusi yang baik
- Kelengkapan unsur dan kualitas terbitan:**
Jurnal memiliki nilai SJR 0,23 dan masuk kategori Q2, serta terdapat hasil review paper. Jurnal ini memiliki reputasi yang baik dan dapat digunakan sebagai prasyarat untuk naik ke Jabatan Lektor Kepala.

Aims & Scope

JESTEC (Journal of Engineering Science and Technology) is a peer-reviewed journal that aims at the publication and dissemination of original research articles on the latest developments in all fields of engineering science and technology. The journal publishes original papers in English, which contribute to the understanding of engineering science and improvement of the engineering technology and education. Papers may be theoretical (including computational), experimental or both. The contribution should be unpublished before and not under consideration for publication elsewhere.

JESTEC maintains a standard double-blind peer review process. The double-blind process means that the identity of the author and the reviewer are not known to each other.

JESTEC is an Open Access Journal and does not charge readers or their institutions for access to the journal articles. The open access supports the rights of users to read, download, copy, distribute, print, search, or link to the full texts of these articles provided they are properly acknowledged and cited.

JESTEC publishes 6 issues per year not including special issues.

Publication fees in JESTEC include submission, reviewing, editing, publishing, and uploading the accepted article in JESTEC website. For all these services, JESTEC charges USD300 per article. The number of pages per article should be minimum 8 pages and maximum 15-18 pages.

2345 - 2358

[Primary recovery factor correlations for thin oil rims with large gas caps](#)

O. Olamigoke, S. O. Isehunwa

2359 - 2371

[A radio frequency identification for academic management](#)

B. Kurniawan, E. S. Soegoto

2372 - 2385

[Fabrication of precast concrete slab panels incorporating foundry sand and blast furnace slag as a potential wall insulator](#)

A. Sivakrishna, P. Awoyera, S. Oshin, D. Suji, R. Gobinath

2386 - 2398

[Variation of flow along a multiple outlets pipe with various spacing and inflow water head based on physical model](#)

W. H. Alawee, B. Yusuf, T. A. Mohammad, H. A. Thahad

2399 - 2409

[Effect of channel length variation on analog and rf performance of junctionless double gate vertical MOSFET](#)

K. E. Kaharudin, F. Salehuddin, A. S. M. Zain, A. F. Roslan

2410 - 2430

[Corrosion inhibition of molybdate and nitrite for carbon steel corrosion in process cooling water](#)

Y. J. Chang, K. E. Kee, S. Hassan, M. F. M. Nor, M. C. Ismail

2431 - 2444

[Estimation of RMS delay spread for double bounce in tropical regions](#)

M. S. Divya Rani, B. K. Sujatha

2445 - 2463
